# PLASTIVISION INDIA 2023: The Extravaganza Planned at Mumbai to Provide Big Impetus to Business

*PLASTIVISION INDIA 2023 is surely one of the most anticipated exhibitions for the Indian plastics industry. Its global participation, innovation on display, prominent industry figures in attendance, and a substantial influx of enthusiastic visitors provide a truly unique opportunity for businesses to showcase their innovations and cultivate valuable business connections. The stage is set for PLASTIVISION INDIA 2023 to leave a lasting impact this year.*

One of the most anticipated shows of the plastics industry, PLASTIVISION INDIA 2023 is back, and this time at a much grander scale. The atmosphere is charged with excitement and eagerness as the show approaches. A fully packed NESCO Ground in Mumbai with an impressive 10 - 15% increase in the occupied area compared to the previous show is a true testament to its increasing popularity. PLASTIVISION INDIA 2023 is set to host participants from 20 different countries, showcasing its global reach and importance on an international scale.

The event has garnered a phenomenal response, with over 1,500 exhibitors taking part in it, with around 30% of them being new entrants. This provides a dynamic mix of both seasoned participants and fresh

## PVI 2023: Providing a 360-Degree Into the Future of Plastics Industry

Plastics, the most efficient material of construction for applications limited to our imagination are going through a transformation in terms of how it is used, retrieved, recycled, repurposed and managed efficiently. The Indian plastic conversion industry will very much feel the implications of the global push towards circularity, sustainability and carbon neutrality.

India's vision of a USD 5 trillion economy will surely provide impetus to

*Explore your agenda to learn more about opportunities in recycling, sourcing of recyclates, solutions to challenges for regulatory compliance, alternatives like bio-plastics and compostables, novel applications based on recycled plastics and a vibrant startup ecosystem, all under one roof at PVI 2023.*

# PVI 2023: A Perfect Confluence of Technology and Business

A substantial 35,000 sq. mts. of exhibition space has been allocated for the engaged companies, projecting the involvement of 1,500 exhibitors; PVI 2023 is expected to transact business of at least Rs. 1,000 crores. Bringing together a harmonious blend of products, technology, innovation and business opportunities, PVI 2023 stands as an essential event that should not be missed.

With the imminent arrival of the 12th PLASTIVISION INDIA 2023, a palpable sense of excitement is in the air. Whether it's individuals eager to secure their space, those meticulously ironing out their visit plans, or those simply enthusiastic about participating in this grand occasion, PVI 2023 appears to hold a significant place on numerous agendas. Throughout the past thirty years, the exhibition's growth has been remarkable, propelling it to the esteemed position of being the world's fifth-largest generator of business activity.

**Mayur D. Shah**  
President,  
AIPMA

feature distinguished figures from the plastics industry, lending crucial momentum and significance to the endeavour.

### Poised for Massive Success

With all-round preparations being put together, the event is poised for a grand success. From the display of live machines, mould makers, converters, raw material manufacturers and packaging and technology, it will present a lot of business opportunities to the participants. Additionally, a series of concurrent events like the grand inauguration, conferences, all association meetings, recycling, EPR, PWM and the Environment Pavilion addressed by world-renowned speakers, will add more spark to it.

### PVI 2023 – Anticipating Huge Participation

Even in the face of prevailing global challenges, PVI 2023 has achieved complete occupancy. A substantial 35,000 square metres of exhibition space has been allocated for the engaged companies, projecting the involvement of 1,500 exhibitors. With an expected number of 2,50,000 focussed business visitors from across the world visiting during the five days of the event, it is expected to transact business of at least Rs. 1,000 crores. Indeed, a great platform under one roof that one cannot afford to miss!

The job fair scheduled during the event is sure to capture considerable attention, as it is being organised to tackle the employment challenges within the plastics industry. It promises to cater to both newcomers and seasoned professionals. With key industry players participating, it presents a substantial platform for job seekers to explore a wide array of opportunities. In order to maximise the reach and impact of the event, a series of road shows are being planned. They will

Lending its full support, AIPMA has worked towards providing several services including an abundance of technology innovations from across the globe, a gateway to expand the network, customer outreach, interactions with industry leaders, enhancing brand awareness of your company, increasing business turnover of each participant, providing sources for agents and distributors in the vast global platform, exploring business and investment opportunities, creating

# PVI 2023: Welcoming All to This Extravagant Business Arena

*This year, the exhibition will feature various Country Pavilions, over 2,50,000 business seekers participation and the event will be packed with various highlights including Theme Pavilions, conferences, technology displays and industry growth roadmaps for the next five years.*

**Chandrakant Turakhia**  
Co-Chairman,  
PLASTIVISION INDIA 2023

**A**s Co-Chairman of PVI 2023, I am thrilled to announce the forthcoming 12th edition of the exhibition, which is scheduled to take place between 7th and 11th December 2023 at NESCO Grounds in Mumbai. This event, supported by national and international trade bodies and associations, ranks as the fourth largest in the world and is endorsed by the Ministry of Chemicals and Petrochemicals (DCPC) and the Ministry of MSME, Government of India. The expo is renowned for being one of the most prestigious events in terms of

business, technology and networking. This year, it will feature Country Pavilions from Germany, Italy, Korea, Taiwan, Turkey, Iran, the UK, the USA and participants from China. We expect over 2,50,000 business seekers to attend and the event will be packed with various highlights including Theme Pavilions, conferences, technology displays and industry growth roadmaps for the next five years.

#### Putting Up a Great Show

Our team has been working diligently to ensure the success of PVI 2023 and we have

“ The expo is renowned for being one of the most prestigious events in terms of business, technology and networking. ”

made extensive on-ground preparations. Some of the key areas of focus include registration, smooth stall possession processes, information and help desks, safety measures, VIP lounges, wi-fi facility, hospitality services, hygienic and affordable food and beverages, parking space, daily

updates, hall-wise exhibitor lists and programmes, luggage reserves, signage to guide movement, restrooms, medical facilities and ambulances with standby doctors, among other utility facilities.

Our aim is to highlight the import substitution of plastics products, promote 'Make in India and Make for the World', showcase the future of plastics through recycling and EPR pavilions and demonstrate the growing demand for plastics in various sectors like healthcare, infrastructure, energy saving, agriculture and more.

# PVI 2023 is the Best Platform for Taking Your Business to the World Market

Once again, PVI 2023 is back with the same energy and a better vision. The RR Plast team is really excited about PVI 2023 as the world has changed a lot since the COVID-19 pandemic in terms of business, and so has the world's view towards the new India which now sees us as the best option for technology. This is our best chance to make the 'Made in India' vision stronger and take it to the global platform. Also, it's our responsibility to provide the best technology to our Indian buyers so they don't look for imports.

PVI 2023 is the best platform for taking our business to the global market and we will be showcasing our latest technological innovations during the exposition.

# PVI 2023 is All Set to Create New Benchmarks

"The SUDHAKAR Group has been the main sponsor for PVI since 2017. Over the years, we have grown as a major plastic pipe manufacturer in India. It is our primary responsibility to support the industry from where we have grown. Supporting PVI gives us the satisfaction of serving the industry as the parent organisation of the exhibition AIPMA has been doing fantastic service for the plastics industry," shares Jayadev Meela, in dialogue with POLYMERS Communiqué.

**Jayadev Meela**  
Member,  
National Advisory Board,  
PLASTIVISION INDIA 2023

**Q. It has been forecasted that the plastics industry will witness astounding growth in the coming years. Being a stalwart of the pipes industry, what is your advice for business entrepreneurs to make the most of this growth opportunity?**

Our government has set its focus on the multidimensional development of the country and we, as one nation, are looking at self-sufficiency and overall development. Plastics have become an integral part of human life. There might be issues with SUP items, which need to be addressed right from the individual level to corporate responsibility, but the new rules and regulations have been framed on this matter and are being implemented. Plastics are eco-friendly products, balancing ecosystems. A world without plastic would be full of metals and other ecologically harmful products.

The Union Government is looking at a double-digit GDP growth with an aim to become the third biggest economy in the world. New avenues, new applications and increased per capita consumption have fuelled the growth of the plastics industry. Industries like packaging, consumer durables, automobiles, and infrastructure and construction are becoming larger consumers of plastics. New-generation plastics, composite products and reinforced plastics are being used largely in day-to-day life and infrastructure industries. New applications and new product developments are more focused, and the entrepreneurs must focus on the newer applications.

Recycling is a very big opportunity in plastics. New SUP regulations and EPR rules have opened new doors for this industry. It is believed that in more than 90% of plastics recycling, a majority of the recycling happens in PET and other plastics only, which are easily segregated. The recycling of SUP is still a big menace as segregation of the same is very difficult. New techniques must be developed to recycle SUP items, which will be a big boon for the industry. Recent developments in plastics pyrolysis in

## PLASTIVISION INDIA 2023: The Extravaganza Planned at Mumbai to Provide Big Impetus to Business

**Harpal Singh**, Chairman - National Executive Committee, PLASTIVISION INDIA 2023

*continued from page 1*

faces all set to showcase their technological innovations and latest product lines. This diverse makeup of participants increases the vibrancy and innovation that the event is poised to offer.

### Ensuring the Best Facilities

There have been substantial preparations made for the convenience of over 2.5 lakh business visitors who are expected to attend the show. The venue now offers good connectivity by the Metro in addition to the other modes of transportation, making the event accessible with ease. There are several 3 to 5 star hotels within a 15 km radius of this site that are easily reachable by Metro. Ample parking is available at the location for over 1,200 cars, ensuring the comfort of the visitors. Moreover, 500 additional parking spaces have been reserved close to the venue.

An online registration mechanism has been introduced to ensure that visitors have simple access to the event. The discounted online registrations are now offered and remain valid till 30th October, 2023. It is suggested to register online as soon as possible to avoid paying higher entry ticket prices starting from 1st November, 2023. This method promotes early engagement and offers a simple registration process for all interested parties.

Every possible effort has been made to ensure that the event offers a memorable experience. The venue in itself is a conducive place for holding such global events, providing a lot of facilities for the convenience of the visitors. In an effort to keep up safety for the exhibitors and visitors, there will be easily reachable medical facilities, such as availability of ambulance services inside the exhibition venue. Also, the fire brigade teams will be available and ready to respond to any call to duty.

### Engaging Promotional Activities

To ensure that there is enough buzz around the exhibition, several engaging visitor promotion campaigns have been meticulously planned. As of mid-September 2023, roadshows have been completed in 3 cities, with plans for roadshows in 25+ cities across India leading up to the event, generating widespread awareness and anticipation among potential visitors.

PLASTIVISION INDIA 2023 is surely one of the most anticipated exhibitions for the Indian plastics industry. Its global participation, innovation on display, prominent industry figures in attendance, and a substantial influx of enthusiastic visitors provide a truly unique opportunity for businesses to showcase their innovations and cultivate valuable business connections. The stage is set for PLASTIVISION INDIA 2023 to leave a lasting impact this year.

## PVI 2023: A Perfect Confluence of Technology and Business

**Mayur D. Shah**  
President, AIPMA

*continued from page 2*

partnerships for joint ventures and tie-ups and building business alliances.

### Highlights of This Year's Show

The main highlights of this year's show include opportunities in technology, education, upskilling and giving speed to the market. Sectors like reverse engineering, tools, mould product design, 3D printing, plastics packaging, hot runner systems and testing services will be in focus - brought to you by AIPMA's AMTEC comprehensive management programmes that aspires to equip startups and make students industry-ready vide the 'Finishing School in Plastics Production Engineering'. These strategic initiatives will be further bolstered by internship opportunities and placement assistance, ensuring a seamless transition into the professional landscape.

By also highlighting the 'Make in India - Make for the World,' the event will exhibit more than 553 plastics products that are presently imported into the country and could be manufactured in India. The showcase of import substitution products will offer processors, particularly those in the MSME sector, a comprehensive understanding. This insight will enable them to uncover fresh avenues for business expansion, potentially

The job fair scheduled during the event is sure to capture considerable attention, as it is being organised to tackle the employment challenges within the plastics industry. It promises to cater to both newcomers and seasoned professionals. With key industry players participating, it presents a substantial platform for job seekers to explore a wide array of opportunities.

contributing around Rs. 37,500 crores to foster self-reliance through the substitution of imported plastic products within India.

PVI exhibitions are organised by honorary people and well supported by nearly 200 volunteers in promotion of the show across the country, making Plastivision India an exhibition 'not to be missed'!

PVI 2023 will provide infinite opportunities to witness, learn, mentor, share and help exhibitors and visitors navigate through the innovations and top quality technology upgradations, which are increasingly becoming essential in current times.

Bringing together a harmonious blend of products, technology, innovation and business opportunities, PVI 2023 stands as an essential event that should not be missed.

## PVI 2023: Welcoming All to This Extravagant Business Arena

Chandrakant Turakhia  
Co-Chairman, PLASTIVISION INDIA 2023

continued from page 3

### Booming Business Opportunities

The event promises to be a grand extravaganza of business and networking with major players and leaders of the national and international plastics fraternity already confirming their participation and presence.

This year's Theme Pavilion will showcase mould and dies, finished products for exports, packaging, recycling (waste to wealth), PWM, EPR - Green Pavilion, plastics in agriculture, automation, solar energy, plastics in medical and healthcare, infrastructure, Consultants Clinic – to assist ease of doing business, job and career fair to address the employment issues, Centre of Excellence – displaying technology to start-ups and MSMEs, seminars and conferences, and B2B meetings.

As Co-Chairman of PLASTIVISION INDIA 2023, it is my great pleasure to share the enthusiasm and dedication of our esteemed

“ Our aim is to highlight the import substitution of plastics products, promote 'Make in India and Make for the World', showcase the future of plastics through recycling and EPR pavilions and demonstrate the growing demand for plastics in various sectors like healthcare, infrastructure, energy saving, agriculture and more. ”

Chairman Harpal Singh; my esteemed colleague Co-Chairman Dr. Asutosh Gor; President, Mayur D. Shah and all office bearers in organising this significant event. Our mentor and stalwart Arvind Mehta, along with all members of the Managing Committee are working diligently to ensure the success of this business arena.

I invite all of you to register online at [plastivision.org](http://plastivision.org) and be a part of the 12th PLASTIVISION INDIA 2023. We look forward to welcoming you to this remarkable event.

## PVI 2023 Offers an Unparalleled Opportunity to Connect With a Global Audience

We are thrilled to be participating as an exhibitor (in Hall-4, Q-2) in PVI 2023, a premier event in the plastics industry. This platform offers us an unparalleled opportunity to showcase our cutting-edge plastic raw materials and manufacturing capabilities to a global audience. The immense influence of PLASTIVISION on our business cannot be understated. We eagerly anticipate connecting with industry leaders, forging new partnerships and exploring the latest advancements in plastic technology. PLASTIVISION has consistently provided us with a platform to expand our reach, strengthen our brand and accelerate our growth. We cannot wait to be part of this transformative event and witness its positive impact on our plastic raw material manufacturing business.

## PVI 2023 is All Set to Create New Benchmarks

**Jayadev Meela**, Member, National Advisory Board, PLASTIVISION INDIA 2023

*continued from page 5*

converting the waste to monomer have given the industry a new ray of hope in managing the non-segregate waste or landfills with plastics.

Industry and government partnership is required in developing new business avenues in plastics.

**Q. A surge in newer applications in the pipes industry is witness to newer materials and technology being applied to cater to various verticals and not limited to irrigation, sanitation and building infrastructure. What are your thoughts on this?**

Change is always welcome. Newer materials

and newer technologies may fade out some of the products and bring new applications. The purpose of pipes cannot be changed, it is meant for transportation of liquid, solid or air only. The new generation plastic pipes are largely focused on the replacement of the conventional metallic piping systems in pressurised applications, sturdy structured pipes in non-pressurised application areas, piping systems suitable for high-rise buildings and fewer joint piping systems.

Product quality, product / application suitability for our environment, manufacturing technology adaptability and, above all, trained and skilled manpower to execute the system installation

Plastics are eco-friendly products, balancing ecosystems. A world without plastic would be full of metals and other ecologically harmful products.

are going to be the key factors in these new pipe systems. In many cases, it is found that one of the above key points is responsible for the failures in any piping system. Adoption of any system without addressing these key points will create chaos.

The industry should focus on bringing new technologies, upgrading

the existing products and their application areas, skilled manpower training and good quality. There has been a significant momentum of a new generation of plastic piping systems in the recent past in pressurised and non-pressurised application areas. Apart from that, conventional piping systems are expanding their usage in other areas. For example, the government's focus now on infrastructure building has created an additional business for PVC pipes in terms of duct for underground power cables. Similarly, there are many new applications for the existing and new-generation plastic piping systems.

**Q. PVI 2023 is one of the most awaited plastic trade fairs. What are some of the key highlights that you wish to share with reference to this edition?**

PVI 2023 is going to surpass the previous editions in terms of exhibitor participation, the overall showcase area, visitor strength and the quantum of business. It will definitely cross all milestones set during PVI 2020.

Recycling is the major thrust area for plastics in India and across the globe. There will be more focus and participation on this topic for technology and applications. Packaging is going to be another major attraction at the show with conventional polymer products and newer bioplastics being on display.

**Q. The SUDHAKAR Group has been supporting PVI since 2017. Tell us more about this relationship that you share with them.**

The SUDHAKAR Group has been the main sponsor for PVI since 2017. Over the years, we have grown as a major plastic pipe manufacturer in India. It is our primary responsibility to support the industry from where we have grown. Supporting PVI gives us the satisfaction of serving the industry as the parent organisation of the exhibition AIPMA has been doing fantastic service for the plastics industry.

Our association with PVI gives us a good brand image, visibility to our product range and several networking opportunities. We support PVI and, in turn, we get the benefit out of it in terms of building our brand image.

## GLIMPSES OF PVI 2020

# PVI 2023: A Perfect Platform to Connect, Collaborate and Grow

Prasad, Asia's largest plastic auxiliary equipment manufacturer is delighted to welcome you as an exhibitor at PVI 2023, the perfect platform to showcase your manufacturing capabilities, modern technology and potential to partner with the Indian and global plastics industry. This event is not just an exhibition of products and solutions, but provides immense opportunities to connect and collaborate with industry leaders, technocrats, and potential clients and sellers.

PVI brings together the entire plastics community under one platform. It is an opportunity no one can afford to miss, especially if you are looking for continuous business growth and sustainable solutions.

## PVI 2023: A Formidable Platform for Technology and Business

As the 12th edition of PVI 2023 nears, the global buzz around the event can be felt in the air. A top priority for the entire plastics fraternity, PVI 2023 is rated the 5th largest business spinner in the world.

It is led by NEC Chairman Harpal Singh, supported by his Co-Chairmen and Chairman National Advisory Board, providing three layers of devoted backup. The President, Office Bearers, Members of the Managing Committee and the able team of the headquarters and other zonal offices ensure all round ease and success of this exhibition.

It is supported by the Department of Chemicals and Petrochemicals (DCPC) and the Ministry of Micro, Small and Medium Enterprises, Government of India, as well as all leading national and international plastics associations. Despite the ongoing challenging times globally, PVI 2023 is fully sold out, encompassing an area of over 35,000 sq. mtrs., 1,500 exhibitors and over 2.50 lakh visitors, expecting to generate business of Rs. 1,000 crores.

### An Extravagant Event in the Offing

The exhibition will witness technology, education and upskilling, thereby providing speed to market. This is brought to you by AIPMA's AMTEC by way of a spectrum of technology-driven high-quality knowledge and industrial services in the areas of

reverse engineering, tool, mould product design, 3D printing, plastic packaging and hot runner systems.

PVI 2023 will also exhibit and display the concept of 'Make in India - Make for the World,' which will showcase over 553 plastics products which are presently imported into the country and could be manufactured in India.

Thus, the PVI 2023 exhibition ground is not merely a fairground, but also a business boulevard gallery, brought to you by AIPMA.
